COMMENTARY

Our retail portfolio consists of six high-quality, dominant shopping malls with strong national anchor tenants delivering rental income streams escalating at a weighted average of 6.9%. The office portfolio consists of 42 buildings in nodes attractive to government tenants. These buildings are mainly single-tenanted buildings let to the National Department of Public Works, providing for a weighted average escalation of 7.2 %. The office portfolio represents a defensive sovereign underpin, shielding the group from private sector risks such as tenant insolvency and default which are material risks in the context of sluggish economic growth and constrained consumer spend.

The group's industrial property is a single-tenanted industrial warehouse with lease escalation at 7,0%.

The groups' expiry profile by gross lettable area is as follows:

	As at 31 August 2018 Monthly	As at 31 August 2018 Vacant	As at 31 August 2019	As at 31 August 2020	As at 31 August 2021	As at 31 August 2022	After 31 August 2022

FUNDING

At 31 August 2018, Rebosis' borrowings increased to R10,7 billion as a result of the additional funding provided to New Frontier to acquire the Dublin asset, the exercise of the Prescient put options to acquire additional shares in New Frontier, and additional loans advanced to New Frontier for capital requirements. The weighted average cost of borrowings increased from 8,7% to 9,8% for the year ended 31 August 2018 – largely due to the additional debt taken at higher interest rates. There are currently swap/fixed arrangements in place for 70,0% of the debt. During the year cross currency swaps amounting to R333,3 million matured and R900 million new cross currency swaps were entered into.

The loan to value ratio has increased from 45,5% to 51,6% (Group) as a result of the additional funding and the simultaneous decrease in the value of investment property. Post the disposal of the Boxwood transaction and the resultant decrease in asset and interest bearing borrowings the loan-to-value ratio decreased to 49,4%.

SEGMENT REPORT

The group classifies segments based on the type of property i.e. Commercial, Retail, Industrial, and Other. Properties can be mixed use properties. In this instance the property will be classified according to its principle use. Accordingly, the group only has three reporting segments as set out below. Some of the buildings do have a small retail component (normally at street level), but seldom exceeds 10% of the total GLA per building.

These operating segments are managed separately based on the nature of the operations. For each of the segments, the group's CEO (the group's chief operating decision-maker) reviews internal management reports monthly. The CEO considers earnings before taxation to be an appropriate measure of each segment's performance.

BASIS OF PREPARATION

The results for the year ended 31 August 2018 have been reviewed by the company's independent auditors, Grant Thornton Johannesburg Partnership. These results have been prepared in accordance with International Financial Reporting Standards (IFRS), the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council, JSE Listings Requirements and the requirements of the Companies Act of South Africa. The report of the auditors is available for inspection at the company's registered office.

The directors take full responsibility for the preparation of these results and confirm that the financial information has been correctly extracted from the underlying financial statements.

All amendments to standards that are applicable to Rebosis for its financial year beginning 1 September 2017 have been considered. Based on management's assessment, the amendments do not have a material impact on the group's condensed consolidated financial statements.

The accounting policies are consistent with those applied in the previous consolidated annual financial statements except for investments in subsidiaries which will now be carried at cost. These financial results have been prepared under the supervision of the Chief Financial Officer, M de Lange, CA(SA).

Other than the information contained in the updated trading statement published on SENS on 9 November 2018, the directors are not aware of any matters or circumstances arising subsequent to 31 August 2018 that require any additional disclosure or adjustment to the financial statements, other than as disclosed in this announcement.

PROSPECTS

Rebosis has made good progress in its strategy to be a retail focused company and is well advanced with the commercial property disposal program. The company will continue to focus on operational efficiencies, and particularly in filling vacancies at its key retail centers. While the commercial portfolio is defensive in nature, management is focused on the disposal program to achieve a loan-to-value ratio of less than 40%. Our portfolio's average escalation is 7%, however growth in distribution for the year ahead will be dependent on improved economic conditions in the retail sector.
